Rajeshwari M (912422104031)

Sri Rathna Lakshmi B (912422104041),

Swathi S (912422104048)

COLLEGE NAME:

Shanmuganathan Engineering College

PROJECT OVERVIEW

Purpose:

- To build a cloud-based system that automates all garage operations using Salesforce.

Key Features:

- Manages customers, appointments, services, and billing.
- Tracks spare parts inventory and service progress.
- Provides real-time insights with reports and dashboards.
- Enhances customer satisfaction with automation and accuracy.

Outcome:

- A complete digital workflow that reduces manual errors and improves garage efficiency.

OBJECTIVES

Main Goals:

- Automate customer management, service booking, and billing.
- Maintain detailed vehicle and service history.
- Provide real-time service tracking for staff and customers.
- Manage inventory and prevent stock shortages.
- Deliver reports for performance, revenue, and trends.
- Improve customer satisfaction with timely updates and faster service.
- Ensure secure and scalable cloud-based operations.

TECHNOLOGIES USED

Platform:

- Salesforce Lightning Cloud CRM

Core Components:

- Custom Objects: Customer, Appointment, Service Record, Billing, and Feedback
- Relationships: Lookup & Master-Detail Fields
- Tools: Lightning App Builder, Flow Builder, Reports & Dashboards

Supporting Tools:

- SmartInternz NME Platform
- Salesforce Platform

Development Type:

- Low-code / No-code Salesforce configuration

SYSTEM WORKFLOW

Process Flow:

- Customer Creation → Stores client details.
- Appointment Booking → Customer schedules service.
- Service Record → Mechanic performs and records service.
- Billing → System generates invoice and payment record.
- Feedback → Customer rates the service.
- Reports & Dashboards → Managers analyze overall performance.

Output:

- A fully connected and automated business process inside Salesforce.

FLOW DIAGRAM

RESULTS & BENEFITS

Results:

- Created 10+ records per object successfully.
- Generated “New Service Information Report” with visual charts.
- Automated service and payment tracking.

Benefits:

- Reduced manual data entry and errors.
- Real-time access to service data.
- Better customer engagement and satisfaction.
- Improved decision-making through analytics.

DASHBOARD OUTPUT

CONCLUSION

Future Enhancements:

- Add Customer Portal for online booking.
- Integrate SMS & Email notifications.
- Enable online payments via gateways.
- AI-driven service recommendations.

Conclusion:

- The Garage Management System built on Salesforce effectively digitalizes garage operations, enhances transparency, and streamlines service delivery.
